QUALITY & SAFE

Our PRP kits are designed for quality and performance. Each kit features triple sterilized tubes that are pyrogen-free, and bio-compatibility tested to ensure safety.

PRP Starter Packages

Are you looking to get started offering PRP therapy or want to make the switch to a user friendly PRP system? With our starter packages, you receive everything necessary to enhance your practice: a centrifuge, balance tube, PRP kits, training, and additional resources.

PRP Tubes (12 ML & 30 ML)

Juventix PRP® Tubes are designed for high PRP concentration, packed in a single-use blister. Our 12ml or 30ml collection tubes work with many different popular centrifuges. If you are unsure, contact our PRP Specialists and let us know which centrifuge your practice is currently using. Our PRP Tubes and Medical Kit can be applied in:

- Orthopedics
- Sports Medicine
- Wound Healing
- Aesthetic Surgery
- Dentistry
- Urology
- Otolaryngology
- Neurosurgery
- Ophthalmology
- Veterinary
- Prolotherapy
- Cardiothoracic
- Maxillofacial Surgery

JUVENTIX™

#1 PRP KIT FOR PLATELET RICH EXTRACTION

HA PRP KIT

Our HA Kit blends PRP with Hyaluronic Acid to restore fullness on loose skin, perfect fine lines and wrinkles, and improve the appearance of scars with little to no downtime. Designed for quick and easy preparation of PRP, our kits ensure optimal platelet recovery and functionality from a small blood sample. Enhanced collagen stimulation lasting up to 1 year.

Collagen Stimulation
Each kit includes two 10ml PRP tubes and 2ml of Hyaluronic Acid

Price: \$299

BIOTIN PRP KIT

Our Biotin Kit blends PRP and Biotin to deliver exceptional hair restoration results. PRP reactivates dormant follicles, while Biotin strengthens keratin infrastructure, promoting healthier, fuller hair growth. Designed for efficiency and precision, this advanced technology enables the quick and easy preparation of PRP, ensuring optimal platelet recovery and functionality from a small blood sample. Plus, our expert product specialists are always available to offer support and guidance every step of the way.

Price: \$199

Hair Restoration

Stimulate Collagen & Elastin

PRF / PRP BIO-FILLER

Our Bio Filler system is thoughtfully designed for practices looking to incorporate bio plasma gel treatments, an organic alternative to synthetic fillers like hyaluronic acid that has many advantages over traditional fillers. Platelet Rich Fibrin (PRF) Bio Filler gel is made from platelet-rich plasma (PRP) derived from the patient's own blood.

The plasma is prepared as a gel to add plumpness to areas with lost volume while smoothing the appearance of fine lines and wrinkles. It is a relatively safe and minimally invasive treatment that can help you achieve noticeable improvements without the risks associated with surgery or synthetic ingredients.

Price: \$4,950

100% Natural

All natural gel derived purely from the patient's own blood

Restores Volume

Restores lost volume and plumps the skin. Added volume lasts 4-6 months

Our Bio Filler is designed to heat and cool multiple syringes of plasma extracted from blood. This process creates a PRP Facial Bio-filler in 8 minutes using the Juventix Medical PRP Kit or PRP Tube Kit and HA/PRP Kit.

JUVENTIX™ BECOME A PRP PROVIDER & GROW YOUR PRACTICE

LED ACTIVATOR

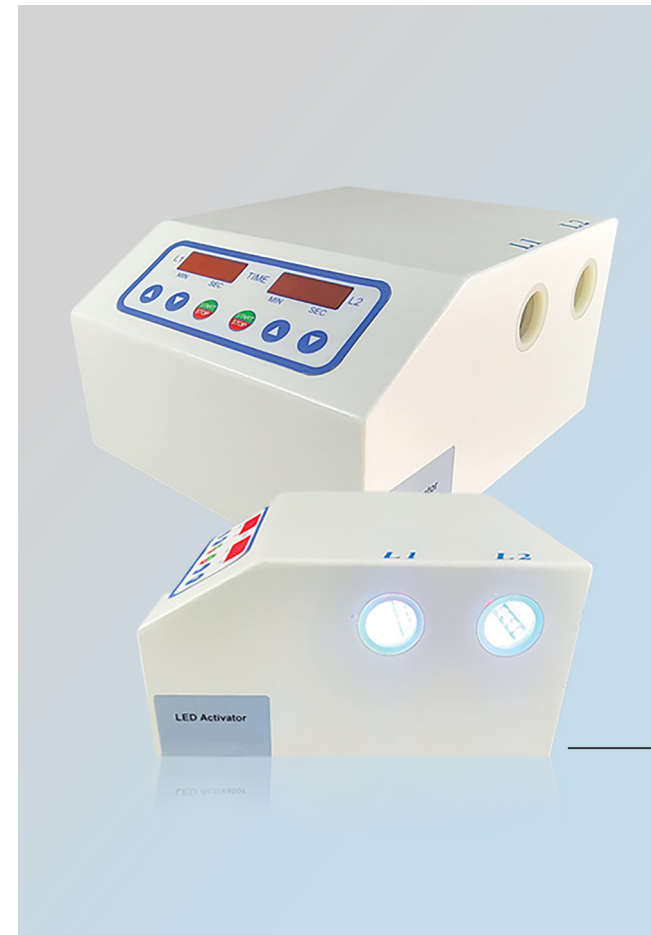

The Juventix LED Activator stimulates the platelets to release bio-active proteins. Platelet Rich Plasma is first concentrated then placed into the LED Activator. During a brief processing period, growth factors and cytokines are released from their storage area on the platelets. The LED Activator insures the highest concentration of regenerative active substances without the use of chemicals while in compliance with current FDA regulations. Engineered for safety and ease of use, the LED Activator provides the greatest quality of activated bio-active proteins to guarantee the best results when using platelet rich plasma for any medical application. The following are selective wavelengths according to the purpose of treatment:

RED: to help cell's growth, collagen synthesis
BLUE: to help cell's self-purification, to restrain lipolysis
GREEN: to help cellular immunity increase
YELLOW: to stimulate cell's activation.

Boost Your Patient's Results

Promote the expression of betal-integrin, one of the keys to successful tissue repair.

Price: \$4,500

NANOPEN® PRO

The NanoPen® Pro uses ultra-sharp, fine needles to intentionally inflict micro-injuries in the skin, believed to stimulate the body's natural healing process. It's effective for use in various aesthetic indications, most notably in improving skin texture and reducing the appearance of scars. The NanoPen® Pro is FDA-cleared for acne scars, meaning it has undergone the 510(k) process, further proving its safety and efficacy.

Precision Needle Depth Control

The NanoPen®Pro allows customization in needle depth settings up to 2.5 mm, leading to enhanced patient outcomes due to more precise treatments tailored to the individual's skin type and treatment goals.

Price: \$1,995

New

FDA Cleared- Advanced Safety Features

The NanoPen® Pro is FDA-cleared and features a range of safety measures, including a sterile, single-use cartridge system and a protective BioSheath, eliminating the risk of cross-contamination between patients.

Simple, Easy & 100% Autologous

A Safe, Effective Solution for Soft Tissue Rejuvenation & Dermal Enhancement.

PRISM PRF™ Tubes for Aesthetics & Orthopedics

Prism PRF™ is simple and fast to prepare. All treatments are 100% autologous, which makes it safe and effective for a wide range of aesthetic, orthopedic, and cosmetic procedures.

Our proprietary tubes are designed to maximize the concentration of platelets and growth factors for promoting healing and regeneration.

Price: \$199.00

Customer Review:

"Excellent service, fast delivery, and easy to order. Our patients' results with the PRISM PRF tubes couldn't be better. I would highly recommend these to any practitioner."

Dr. O Thornton, MD

New

Prism PRF™ tubes are designed to produce autologous platelet-rich fibrin (PRF) without the use of anticoagulants or artificial additives (biomedical modifiers). This allows for the formation of fibrin membranes and plugs rich in platelets and leukocytes—ideal for wound healing, aesthetic procedures, orthopedics, and regenerative therapies. Once applied to the treatment site, PRF acts as a natural reservoir, gradually releasing growth factors and cytokines over 7 to 14 days. This sustained release supports tissue regeneration, accelerates healing, and enhances overall clinical outcomes.

When selecting PRP or PRF tubes, two factors matter most: purity and platelet recovery. Prism PRF™ excels in both—giving clinicians the confidence to deliver consistent, high-quality results. Our proprietary advanced gel plug ensures exceptional purity by minimizing red blood cell (RBC) and inflammatory white blood cell (WBC) contamination—resulting in one of the cleanest PRF products on the market.

KEY BENEFITS:

Box includes 4 tubes (15ml) for the creation of PRF.

Individually sterile blister packs to eliminate any chance of contamination.

Additive Free - Does not contain Anticoagulants or other chemicals.

Tubes comply with all regulatory requirements specific to this type of Class IIa medical device.

The Ultimate Facial Rejuvenation Treatment

EVE™ Hydra-Dermabrasion

Achieve better results by prepping every procedure with Eve. Boost your cash revenue by up to 30% by incorporating the Eve Hydra-Dermabrasion treatment before cosmetic procedures. Many clinics report an average add-on price of approximately \$225 per treatment.

Price: \$15,950

Glowing & Radiant Skin

Hydra-Dermabrasion,
Diamond Peeling,
Microcurrent & EMS

The Eve Hydra-Dermabrasion is the latest innovation currently trending in the skincare industry. Whether used alone or to prep the skin for advanced treatments, The Eve Hydra-Dermabrasion is effectively targeting sun damage, hyperpigmentation, and acne scars. Patients often notice a radiant glow, smoother tone, and minimized pores after just one session. Regular treatments enhance elasticity and hydration, with monthly sessions recommended for lasting results. Additionally, 12 pre-set protocols ensure consistent, professional outcomes—no matter who operates the device.

First, the skin is cleansed with a gentle cleanser to remove makeup and impurities. After the Hydra-Dermabrasion facial, PRP/PRF, peptide serums, exosomes, or stem cells are infused into the skin to hydrate and rejuvenate. The treatment concludes with optional add-ons or lymphatic drainage to reduce puffiness and enhance circulation. The entire process typically takes 30 to 60 minutes.

EMS / Microcurrent Treatment Modes:

Micro ball type - Intensifies the current and increases effectiveness.

Micro-current - Hand-piece is designed exquisitely for more comfortable use.

T type - To lift broader areas such as cheekbones, peri-orbital wrinkle & jaw line.

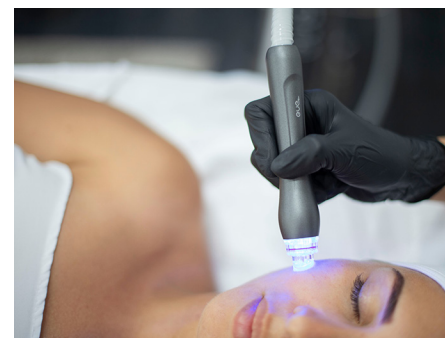

Comb type - To energize hair follicles, promote blood circulation, diminish hair loss, reduce dryness and dandruff.

Patch - Easy, hands-free micro-current treatment targeting fine lines and wrinkles.

Gloves - Ideal way to provide a more detail oriented micro-current treatment to fit your client's unique needs for facial lifting and toning.

One Device. Endless Opportunities.

The EVE Hydra-Dermabrasion device pays for itself after approximately 30 treatments—based on an average patient charge of \$500 per session.

REJUVENATION & HEALING BOOSTING SERUM

PRiVIVE™ Topical Serum is a versatile and innovative topical serum developed to revitalize the skin through enhanced cellular rejuvenation. This advanced serum boosts collagen synthesis, improves skin elasticity, and enhances the overall texture and firmness of the skin, making it appear younger and more radiant. Whether addressing fine lines, wrinkles, or the effects of aging, PRiVIVE™ delivers noticeable improvements by working at the cellular level.

What truly distinguishes PRiVIVE™ is its proprietary delivery system, a clinically tested technology that ensures deep penetration and superior absorption of its active ingredients. This delivery system maximizes cellular utilization, ensuring the skin fully benefits from the serum's potent ingredients.

Designed for use on all areas of the body, PRiVIVE™ is a multi-functional topical serum that not only enhances the skin's appearance but also supports deeper tissue rejuvenation. It's an effective option for improving the tone, texture, and overall vitality of the skin, making it a must-have for any practice focused on advanced skincare.

PRiVIVE™ also delivers unique additional ingredients to create a synergistic and holistic improvement to cellular structure, integrity and function.

Special Offer

Buy Direct and Save with this special offer of \$68 per bottle.

PRiVIVE™ TOPICAL SERUM

Boosts cellular rejuvenation, collagen production, and skin elasticity with advanced absorption, customizable with PRP, Peptides or Exosomes for optimal results.

Advanced Skin Permeation Technology

WHY PRiVIVE™ ?

An award winning combo of ingredients and proprietary delivery technology to promote a multitude of outcomes. Simply mix PRiVIVE™ with PRP, Exosomes, and/or Peptides to create a personalized serum for patients to boost results. Simply apply once or twice daily or as needed depending on the application or if you have mixed with PRP, Exosomes and or Peptides.

* FOR TOPICAL USE ONLY

There Is No Limit on How You Can Use PRiVIVE™

Combining PRiVIVE™ with PRP, Exosomes or Peptides can provide a multitude of use cases including promoting:

- + Hair Restoration
- + Skin Healing and Rejuvenation
- + Improved Cell Signaling
- + Skin Hydration

These benefits occur both topically and at a deeper level.

An essential oil that enhances and maintains the skin's natural balance reducing the appearance of blemishes and wrinkles.

ADVANCED+ Skin-Care Solutions (Apollo Duet + Peptide Serums)

Apollo Duet uniquely combines three leading cosmetic technologies – multipolar radio frequency, electroporation, and iontophoresis to deliver superior skin rejuvenation and tightening treatments. This FDA Cleared device enhances collagen production, improves skin elasticity, and provides non-invasive lifting, making it an essential tool for medical professionals looking to offer high demand cosmetic procedures. With its dual-modality approach, the Apollo Duet ensures deeper penetration, optimal results, and patient comfort, setting it apart from conventional skin devices. Whether treating fine lines, wrinkles, or skin laxity, this device empowers physicians to provide noticeable improvements with minimal downtime. A built-in temperature sensor in the RF handle allows users to track patients' skin temperature in real-time and to adjust treatment accordingly. Skincare professionals using Apollo Duet can precisely tune all treatment parameters, including any topicals or Peptide Serums to be used, the target temperature of skin heating or cooling, intensity of radio frequency (RF) and electrical currents, and polarity of iontophoresis.

LED Light Therapy

Best Seller

Red. Blue. Infrared Light.

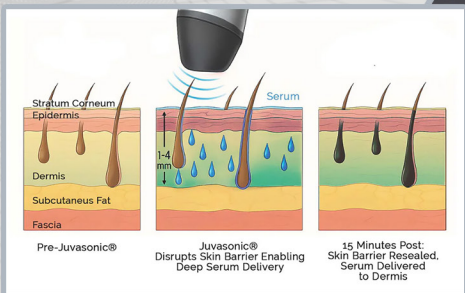

DermaMend Laser

Low-Level Light Therapy (LLLT) with DermaMend is the therapeutic use of specific light wavelengths to photomodulate cellular function. Proven results for improving healing times, reducing pain, subsiding active acne, promoting skin rejuvenation, psoriasis, hair restoration, and more.

DermaMend harnesses the properties of 450, 630, and 850 nm light via Light Emitting Diode (LED) technology properly delivered and concentrated without discomfort or downtime. In-office LED light therapy uses more powerful strengths than portable or at-home devices, which makes it more effective. DermaMend LED Laser can be used as a standalone therapy or as an adjunct to almost any aesthetic treatment.

Price: \$4,950

Juvasonic®

Needle-Free. No Downtime. No Pain.

Juvasonic® is a handheld FDA registered Class I Medical Device (patent-pending) designed to enhance topical absorption of exosomes, PDRN, PRP, and peptides. With precision-engineered microchannel vibration, microdermabrasion and dual-wavelength light support.

The device offers three adjustable speed settings and red and blue LED. A versatile companion for providers delivering advanced skincare and haircare protocols.

Price: \$1,900

Shockwave Therapy

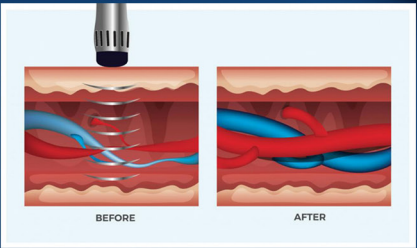

Physio PRO

The PhysioPRO systems are clinical grade shockwave therapy systems that induce an intracellular and extracellular reaction to assist in the healing and recovery of soft tissue. Common conditions treated with Shockwave Therapy include:

- Tennis Elbow
- Golfer's Elbow
- Plantar Fasciitis
- Achilles Tendinitis
- Disc Disease in the Back
- Rotator Cuff Tendinitis
- Osteoarthritis

Shockwave Therapy is a non-invasive treatment that uses acoustic waves to stimulate the body's natural healing processes and may be an alternative to surgery or medication.

Revitalize Skin Tone & Texture

Microneedling + Radiofrequency (RF) =
Exceptional Natural-Looking Results

RADIANCE RF™ Microneedling System

RadianceRF is a cutting-edge "Subdermal Adipose Remodeling Device" (SARD) that merges microneedling with radiofrequency (RF) energy to reach the deeper layers of the skin. This advanced technology stimulates the production of collagen and elastin, revitalizing aging skin with remarkable effectiveness. Unlike standard microneedling devices or standalone RF treatments, RadianceRF penetrates deeper, harnessing the synergistic benefits of both methods for stronger, longer-lasting results.

RadianceRF can be used to treat a wide range of concerns including facial wrinkles, acne scars, enlarged pores, sun damage, and even laxity on the neck.

Customer Review:

"I am so pleased with my Radiance device. It's very user friendly. The treatments are very well tolerated and the results we are getting have exceeded my expectations."

Dr. M Joesph, MD

RadianceRF stands out due to its ability to reach deeper skin layers compared to other RF microneedling devices. The device heats subdermal tissue up to 8mm (7mm + 1mm thermal profile), leading to more substantial collagen stimulation and visible improvements in skin texture and firmness. With ultra-fine needles, RadianceRF precisely delivers RF energy into the skin's deeper layers, creating micro-lesions that trigger the body's natural healing process. This stimulates the formation of new collagen and elastin, resulting in a denser and more impactful build-up compared to similar devices. The procedure is minimally invasive, making it an attractive option for patients looking for effective skin rejuvenation without significant downtime. While generally considered manageable, some patients may experience mild redness, swelling, and crusting following treatment, which can require a few days of downtime.

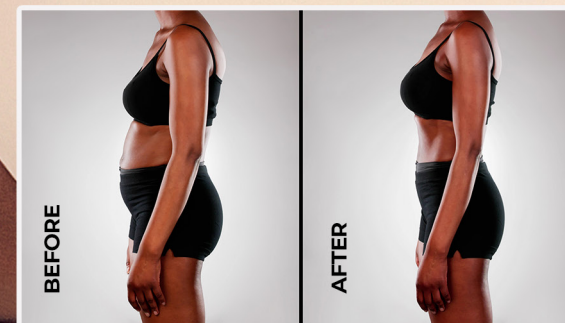

Define Your Beauty & Radiate Confidence

GEMSTONE Body Sculpting Laser™

Gemstone redefines non-invasive full-body sculpting with an advanced 532nm green laser designed to target areas of stubborn fat. Gemstone can stimulate collagen production, improve skin elasticity, reduce cellulite, and treat overall body circumference by emulsifying fatty tissue through low level laser technology.

Price: \$45,000

Slim. Tone. Tighten.

Body Sculpting & Skin Tightening Treatments with Gemstone Laser™

KEY BENEFITS:

- 360° laser light scanning
- 532nm Low-level green laser therapy
- Overall circumference reduction
- Improvement after 1-2 treatments
- 12.1-inch touch screen
- No Set-up time
- Unattended, Not Applied Directly on Skin
- Firms and improves skin elasticity
- No know side effects
- Convenient 30 minute sessions

Non-Surgical and Non-Invasive: GEMSTONE is a completely non-surgical, non-invasive fat loss solution—no needles, no incisions, just results. This gentle treatment never touches the body, yet effectively targets stubborn fat for a more sculpted look. By focusing on problem areas during each session, GEMSTONE delivers a precise and customized approach for optimal results. Whether patients are looking to slim arms, define the waist, tighten the tummy, or tone the hips and thighs, this advanced technology helps them achieve noticeable, lasting improvements.

The GEMSTONE Laser™ harnesses cutting-edge laser technology to precisely target stubborn fat cells in specific areas of the body. Using a 532nm green laser, it penetrates deep into the skin, stimulating fat cells to release stored fat through a natural process called lipolysis. The body then eliminates the fat through its own metabolic system, promoting safe and effective fat reduction.

During each 30-minute session, patients will relax comfortably as 10 lasers work simultaneously to target and shrink fat cells. With as few sessions, patients can experience noticeable fat loss and a more sculpted, contoured appearance. Individuals who have struggled with stubborn fat for years, GEMSTONE is a clinical breakthrough offering long term solutions.

Whether patients are looking to reduce fat, tighten skin, or achieve both, this cutting-edge technology merges science and innovation to reshape the body. With GEMSTONE, patients can finally say goodbye to problem areas and hello to a more sculpted, confident self!
